hi@vishalsharma.dev | +91-9649317497

EDUCATION

BML MUNJAL UNIVERSITY
B.Tech in Computer Science
Expected May 2021 | Gurugram, IN
GPA: 8.34/10

LINKS

Github:// **makeavish**
ICPC:// **makeavish**
CodeChef:// **makeavish**
Codeforces:// **makeavish**

SKILLS

PROGRAMMING
C/C ++ • Python • Java
Familiar:
Go• MongoDB • Git
Shell• Flask• MySQL

COURSEWORK

UNDERGRADUATE
Design and Analysis of Algorithms
Information Retrieval
Software Engineering
Image Processing
Artificial Intelligence
Discrete Mathematics
Probability and Statistics
Operating Systems
Database Systems
Computer Networks
Object-Oriented Programming

INDEPENDENT
Deep Learning in PyTorch (Udacity)
Android Developer Basics (Udacity)
Data Analytics in finance using Python
(Udemy)
C++ With DS (Coding Ninjas)
Complete Python bootcamp (Udemy)
Complete Web development bootcamp
(Udemy)

MORE ABOUT ME

Minimalist • Avid Reader • Planner
Podcasts • Chess • Open Source
Solved 1000+ problems on Online Judges

EXPERIENCE

OKCREDIT | Software Engineer Intern
Aug 2020 – Present | Remote | Bengaluru, IN
- Developed internal tools for software testing and user success team
- Improved efficiency of internal teams by more than 50%
- Stack: Go, Postgres, Js, Retool

EPLANE.AI | Deep Learning Intern
May 2019 – July 2019 | IIT Madras | Chennai, IN
- Built an Actor-Critic Reinforcement Learning model for Autonomous Drone
- Implemented part of VLocNet for localization of Drones
- Stack: Tensorflow, Sklearn, PyTorch, Docker, Linux

BALNC CARE LTD. | Machine Learning Intern
Feb 2019 – April 2019 | Remote | Gurugram, IN
- Worked on a Machine Learning model of Pose Estimation
- Implemented a RNN model to predict pose
- Stack: OpenCV, Python, Sklearn, Pandas, PyTorch

PROJECTS

SKIN CANCER PREDICTOR
July 2020 | https://github.com/makeavish/SkinCancerPredictor
- Created a flask web app which predicts skin cancer with 87% accuracy
- Used transfer learning(InceptionV3 model) to classify skin cancer images

QBOX, QMONEY AND QCHARM
February 2020 – April 2020 |
https://criodo.github.io/Crio-Launch-Feb-2020-makeavish786/
- QBox - Created a service like Dropbox using Vsftpd
- QMoney - Worked on backend of a stock portfolio management application
- QCharm - Built an online text editor
- Upgraded performance by using hybrid data structures and algorithms
- Used bash scripts, REST APIs, Java

RESEARCH ASSIST
October 2019 – November 2019 |
https://github.com/makeavish/ResearchAssist
- Implemented Focused Crawler to build a research paper search engine
- Focused Crawling helped reduce search time and enhanced efficiency
- Developed using Python and its libraries like BeautifulSoup, NLTK, request, PyPDF

AWARDS

Year	Rank	Award
2020		Ranked in top 100 (120,000+ participants) Hackwithinfy2020
2020		Won at college and qualified for Smart India Hackathon Finals
2019	37/106	ACM ICPC Kanpur Regional Round
2019	179/4441	ACM ICPC Online Round
2018	1/40	Alibaba Tianchi NLP Hackathon
